## I. Introduction and Executive Summary

## 1. Introduction

Eritrea: Basic education statistics is the official, annual education information publication of the Ministry of Education (MOE). In the academic year 1994/95 and 1995/96 it was published as part of the Eritrea: Basic education statistics and essential indicators publication. Starting from 1996/97 it was thought convenient to divide the publication into two, i.e. the general descriptive information and the fundamental indicators.

The Department of Research and Human Resource Development-EMIS issue the abstract. This issue provides mainly the common descriptive education information of the academic year 2001/02. This academic year's issue is the sixth of its kind in terms of organisation of schools in the new six administrative regions, the Zobas.

The MOE likes to emphasise that the publication of this issue would have been impossible without the unfailing endeavours of the education statistics teams in the Regions, Sub-regions and concerned educational institutions.

We truly appreciate UNICEF: Eritrea office for its support in financing the printing of such publications. The MOE forwards its usual appreciation to all.

Please feel free to give us your serviceable feedback regarding the content and form of this education abstract so that we may in the future attend to your requirements.

## 2. Executive summary

In 2001/02 academic year enrolment in elementary education increased by 10.6 percent as compared to 2000/01, but enrolment in special education decreased by 0.9 percent.. The increase in elementary enrolment is mainly seen in Debub and Gash-Barka regions. Enrolment in middle and secondary education increased by about 5.6 percent and 9.7 percent respectively. Enrolment in technical schools increased by 7.9 percent while enrolment in adult literacy programs decreased by about 3.1 percent.

Enrolment of girls in elementary education in 2001/02 as compared to 2000/01 increased by 9.0 percent. The enrolment of girls in government schools in 2001/02 as compared to 2000/01 increased by about 10.2 percent.

As compared to 2000/01 the national enrolment of girls and boys in 2001/02 increased by 6.8 percent. However, the participation rate of girls is still lower than that of boys except in literacy, and adult continuing education programmes which is 90.3 and 65.8 percents respectively. The enrolment of females in pre-primary, elementary, middle and secondary are respectively 47.4 percent, 44.3 percent 42.9 percent and 35.7 percent.

The number of schools, enrolment and teachers in pre-primary education has increased by 4.4 percent, 2.5 percent and 8.3 percent respectively. The number of schools by level in elementary has increased by about 4.5 percent, in middle by about 7.0 percent and in secondary schools by about 2.3 percent. The number of literacy program centres increased by 19.4 percent. The number of teachers in elementary, middle and secondary has increased by 12.4 percent, 11.0 percent and 19.4 percent respectively.

The gross national accessibility to schooling in 2001/02 was about 6.0 percent, 63.9 percent, 45.6 percent and 23.7 percent in pre-primary, elementary, middle and secondary education respectively. Enrolment in elementary special education decreased by 0.9 percent.

## II. Important notes

## 1. Population

1.1 For purposes of this current issue, the 2001-population estimate of the National Statistics and Evaluation Office (NSEO), 3,215,313 is used. (Ministry of Education Eritrea: Population projection by single year and age 1991-2017 is used whenever single age calculation was needed.)

> We would like to remind users of our yearly abstracts that we have been using different population estimation in our previous publications. We have used the new population estimation, which is considered to be a better estimation, as a base to calculate school-age population and thus enrolment and other essential indicators as well.
1.2. Average population density: 29/sq.km.
1.3. Total school-age population by school level (estimated percentage of the total population for the year 2001).

| Age group | Population | Estimated \% of total population |
| :---: | :---: | :---: |
| $5-6$ | 208,703 | 6.49 |
| $7-11$ | 504,246 | 15.68 |
| $12-13$ | 175,758 | 5.47 |
| $14-17$ | 292,355 | 9.09 |

2. Area of the country: approximately $\mathbf{1 2 3 , 3 0 0} \mathbf{s q} . \mathbf{k m}$.

## 3. School system

| Level | Grade | Age |
| :--- | :---: | :---: |
| Pre-school | I, II | $5-6$ |
| Elementary | $1-5$ | $7-11$ |
| Middle | $6-7$ | $12-13$ |
| Secondary | $8-11$ | $14-17$ |

4. Dependency ratio defined as the sum of all persons under 15 years or over 64 years divided by the number of persons age 15-64.

| Age-group | Population | Dependency ratio |
| :--- | :---: | :---: |
| $0-5$ years | 540,380 | 32.9 |
| $6-14$ years | 865,853 | 52.8 |
| 65 years and above | 168,594 | 10.3 |

| Total dependants (estimate) | $1,574,827$ |
| :--- | :---: |
| Total non-dependants (estimate) | $1,640,486$ |
| Gross Dependency Ratio | 96.00 |

## IV. Pre-primary level

## 1. Pre-primary schools

There were 95 pre-primary schools in the whole country. Forty-nine ( $51.5 \%$ ) of them are located in Zoba Maekel. Out of the Forty-nine pre-primary schools in Zoba Maekel 40 (81.6\%) are located in Asmera, the capital city.

Only $6(6.3 \%)$ out of the 99 schools are government owned, $49(51.5 \%)$ are run by missionaries and the rest are run by the public and community.

## 2. Pre-primary enrolment

Children of ages 5 and 6 are supposed to be enrolled in pre-primary schools. The gross enrolment ratio for the academic years 1991/92 and 2000/2001 was ( $4.3 \%$ and $6.1 \%$ respectively) very low. In order to improve the situation, private organisations and individuals need encouragement to open new preprimary schools.

## 3. Pre-primary teachers

During the academic year 2001/2002 there were 353 pre-primary teachers in the whole country of whom 236 ( $66.8 \%$ ) had some professional training. 113 females and 4 male teachers were without any training. The number of teachers in pre-primary schools as seen in the following tables is very low. The opening of new pre-primary schools will therefore require training of new teachers.

The percentage of female teachers in pre-primary schools expressed as a percentage of the total number of teachers at this level is $98.3 \%$. One can see from the table 6 that almost all teachers in pre-primary schools are females. In the academic year 1993/94 only one teacher, in 1995/96 other two male teachers and in 1998/99 other six male teachers joined the teaching force. In 2000/2001 the number of male teachers was only 6 .

## V. Elementary level

## 1. Duration

Elementary level (grade one to five), together with the Middle level (grade six to seven) comprise the primary level and the compulsory basic education (grade one to seven).

Starting from 1991/92 academic year enrolment at the elementary level has been steadily increasing. At this level, MOE's priority is to ensure that pupils learn in their mother tongue.

## 2. Enrolment

Enrolment for the year 2001/2002 was 330,278 out of which 146,218 (44.0\%) were females. Out of the total enrolment in elementary schools, $27,269(8.2 \%)$ were attending non-government schools.
Encouragement is needed for the private sector in order to increase participation.

Table 12 indicates that the percentage of over-age pupils has been decreasing every academic year, except for the 1997/98 academic year. In the year 2001/02 the percentage of over-age students in grade 1 is lowered to 50.0 percent. As can be seen from the table a lot has been done. But, still hard work is needed in order to reduce the number of over-age students, particularly in grade 1 .

From the year 1991/92 until the year 1997/98 except for the academic year 1996/97 enrolment of underage was continuously decreasing. This is true because MOE regulations in those years did not allow children under 7 to be enrolled in elementary schools. Starting from the year 1997/98 the enrolment of under-age children increased continuously. This development could be explained by the ministry's apparent permission to register children of 6 years of age.

## VI. Middle level

## 1. Duration

The duration of Middle level is two years (grade 6 and 7). It is the second part of the compulsory basic education. Medium of instruction in this level is English.

## 2. Enrolment

Enrolment for the academic year 2001/02 was 80,882 . Female enrolment constitute 34,667 (42.9\%) of the total number. Approximately $7.1 \%$ of the pupils in the Middle level were attending non-government schools.

The total percentage of repeaters had been declining between 1992/93 and 1996/97 but has been increasing in the last five years.

## VII. Secondary level

## 1. Duration

The duration of Secondary level is four years (Grade 8-11).

## 2. Enrolment

Enrolment for the year 2001/2002 was 70,183. Female enrolment constitutes 25,054 ( $35.7 \%$ ). Approximately $3.8 \%$ of the students in the Secondary level were attending non-government schools.

## VIII. Internal efficiency

## 1. Length of school year.

The duration of the school year in the academic year 2001/02 was 191 days in both the highlands and lowlands. In both regions the number of periods per week in grades 1-2 and 3-5 was 25 and 35 respectively. (There are 5 periods for grades 1-2 in a day and 7 periods for grades $3-5$ in a day). In other grades the number of periods per week is 35 .

In the academic year 2001/2002, schooling in the highlands began in September 17 and ended in June 28. In the lowlands it began in October 1 and ended in May 31. Schools in the lowlands teach 6 days a week while schools in the highlands teach 5 days a week.
The duration of the school year in 2001/2002 is shown in table 31.

## 2. Teachers' qualifications

Teachers in the elementary level are considered technically qualified if they are graduates of the TTI or have an equivalent / higher qualification.

Teachers in the middle level are considered technically qualified if they have a qualification of higher education diploma ( $12+2$ )/ have an equivalent / higher qualification.

Teachers in the secondary level are considered technically qualified if they have a minimum qualification of BA or BSc .
